Subject: OIG Follow Up Question

Hi Ted and Kelly,

As a follow up to yesterday's call with the OIG, they had asked us to provide documentation demonstrating how the 83% reduction in ethylene oxide emissions was determined for the New Mexico census tract, shown in this screen shot below:

<image001.jpg>

Could you please provide any documentation you have that demonstrates how this 83% reduction was calculated? Please let me know if you have any questions.

Thank you,
Tegan
